◆ PROFILE

Java & Scala Software Engineer — 8 years of experience building critical backend platforms, microservices architectures and securing applications at scale (OWASP, Kubernetes). Full-stack from backend to React Native. Certified CKA, CKAD and PSM1.

◆ EXPERIENCE

- ◆ **Darva · e-constat**
2025
Security audit and refactoring of an automotive incident report application: OWASP compliance, endpoint and file upload hardening, exception handling overhaul, authentication-free secure access mechanism for third-party partners.
Java · Spring · Microservices · OWASP · REST API
- ◆ **Darva · Nomad — 3 years**
2022 — Now
Core contributor for 3+ years: full refactoring of the Scala legacy backend, cache optimisation, CVE monitoring, CI/CD modernisation and end-to-end feature development — backend, API and React Native.
Scala · Play Framework · React Native · MongoDB · CI/CD · Docker
- ◆ **Cariad · Golden Algo**
2021 — 2022
Feature development for a video image labelling platform for autonomous driving model training. Contributed to data processing pipelines and Azure cloud integration.
Scala · Akka · Azure · React
- ◆ **Darva · Sinapps IRD — 2 years**
2019 — 2021
Development of a home insurance claims management application: business workflow modelling, backend APIs and React interfaces.
Scala · Play Framework · React · MongoDB
- ◆ **Linagora · LinShare**
2018 — 2019
Backend development of an encrypted file-sharing platform. Delivered the MVP of a secure Android mobile app for the French national gendarmerie.
Java · Scala · React · MongoDB · PostgreSQL · Android
